UNIVERSITY OF MIAMI ALLERGY DIAGNOSTICS & ALLERGEN IMMUNOTHERAPY TRAINING WORKSHOP

UNIVERSITY OF MIAMI
MILLER SCHOOL
of MEDICINE

UNIVERSITY OF MIAMI
DIVISION of CONTINUING
& INTERNATIONAL
EDUCATION

miami.edu/allergy

The Allergy Diagnostics & Allergen Immunotherapy Training Workshop gives medical practitioners the hands-on training they need to diagnose, treat, and manage patients with noncomplex, non-life-threatening allergies.

The University of Miami Allergy Diagnostics & Allergen Immunotherapy Training Workshop was developed in collaboration with the University of Miami Division of Continuing and International Education and the Miller School of Medicine.

The program empowers physicians, nurse practitioners, nurses, physician assistants, and other medical professionals to develop evidence-based skills and knowledge in the field of allergy and immunology. Participants will learn leading practices from Miller School of Medicine clinical practitioners and faculty members. Among the instructors is a board-certified otolaryngologist with 30 years of experience in allergy testing and treatment, as well as a family medicine physician who incorporates allergy and immunology into their practice.

Why is allergy diagnosis and treatment important?

According to the Centers for Disease Control and Prevention, allergies are the sixth leading cause of chronic illness in the U.S. with an annual cost exceeding \$18 billion, affecting more than 50 million Americans each year. This substantial need for allergy diagnosis and treatment is one of the many reasons allergy treatment is moving into primary care, pediatric offices, and other non-traditional settings. In addition, evidence shows that patient outcomes are improved, and medical costs are reduced through proper allergy diagnosis and increased access to management and treatment.

The Academy of Allergy & Asthma in Primary Care endorses this program, which fits with its mission to support primary physicians in better managing their allergy-suffering patient populations.

At a Glance:

- Instruction provided by Miller School of Medicine clinical practitioners and faculty
- Delivered in a synchronous and remote delivery format
- Participants receive a certificate of completion from the University of Miami, demonstrating mastery of skill-based competencies
- Provides ten (10) hours of Continuing Medical Education (CME) credits (AMA PRA Category 1™)

Early Bird Discount: \$415

Enroll by May 31, 2021, and save with our Early Bird discount. Enter the code **EB415** at checkout to receive the Early Bird pricing of **\$415**.

Registration Fee: \$595

Group discounts are available

This One-Day Workshop Will Distinguish Participants in Today's Evolving Market by Empowering Them To:

- Perform and interpret allergy skin and blood tests
- Determine how and which allergens cause reactions
- Administer allergy treatment
- Manage allergic diseases in relation to other chronic conditions
- Understand the billing and coding required for recording and insurance reimbursement of allergy diagnosis and treatment

Participants will be able to offer allergy diagnosis, treatment, and management in their practice.

Upcoming One-Day Workshop

ALLERGY DIAGNOSTICS & ALLERGEN IMMUNOTHERAPY TRAINING WORKSHOP

Saturday, June 26, 2021
Offered Remotely
